Summary

An ambitious, highly motivated and articulate consultant with excellent communication and time management skills. Experienced with working under pressure and is able to work as part of a team or individually to deliver a high standard of service. Approachable, well presented and easily establishes good working relationships with a diverse range of people. Possesses a proven ability to generate innovative ideas and solutions to problems.

Work Experience

Accenture

London, UK

GOOGLE CLOUD SERVICE MANAGEMENT & TECHNICAL PRE-SALES

May 2016 - PRESENT

- Senior application specialist aligned to strategic premium customers in Cloud First. Working closely with clients in developing initiatives, delivering security reviews and leading new Google Cloud opportunities.
- Fostered a thriving Google Culture within Accenture Cloud First through product demonstrations, town halls and leadership meetings, which lead to increased visibility of Google offerings and opportunities to work with client account leads on future projects.
- Technical specialist in Google Cloud products, involved with the support team as point of escalation for serious (P0/P1) incidents for UK premium customers. Responsibilities include: managing communications with C-Suite stakeholders, resolving the technical challenge and engaging with senior managers at Google to escalate case resolution.
- Increase client user adoption in G Suite through workshops, training and change management process.
- Analyse business use cases, gather requirements from clients, propose and demonstrate innovative solutions.

Extended Content Solutions
